

Business Opportunities in Colombia - Seminar/Videoconference

Tuesday, October 22, 2013 – From 9:00 a.m. to 12:00 noon

Ontario Investment Trade & Centre - 250 Yonge Street, 35th Floor, Toronto

Colombia continues to be a top performer in Latin America, presenting greater historic GDP trends than neighbouring countries. A strong, stable economy offers opportunities for the development of various sectors including infrastructure which is a major focus of the Colombian government and with active involvement by both the World Bank and Inter-American Development Bank.

For example, one of the key initiatives focuses on emerging and sustainable cities, in the areas of housing, transportation, water and energy use and public services. The export of consulting engineering services, capital goods and equipment, training and technology, as well Public-Private Partnerships (or PPPs) are of great interest to Canadian companies.

The Ontario Government, Ministry of Economic Development, Trade and Employment, is pleased to work with its partners to offer you a seminar/videoconference on October 22nd, to provide you with the latest information on the business opportunities in Colombia's infrastructure.

We have assembled key speakers from Colombia's Department of National Planning, the World Bank and Inter-American Development Bank, Export Development Canada and the Canadian Embassy in Bogota.

The half-day seminar is free of charge, but space is limited, so please complete and submit the registration form today and ensure a chance to expand your business knowledge of Colombia.
